

Vision

Vision is our newest biometric clock and has the latest facial recognition technology.

Vision confirms identity faster and more accurately than ever. Since verification takes less than a second, clock-in is quick and orderly.

Unlike fingerprint clocks, facial recognition is not affected by gloves or dusty, greasy, or worn fingerprints. This makes it ideal for most work environments including office settings, healthcare, retail, hospitality, educational, manufacturing, and industrial.

In addition, Vision is your best protection against buddy punching which can be common with PIN and prox card systems. Vision makes buddy punching impossible which saves your labor budget.

With Vision, you can collect exact clock-in/out time data in real time from every site. Discover the ease, security, and reliability of Vision for shift clocking.

Specifications

- Processor: Cortex A9
- Display: 7" TFT LCD Capacitive Touch Screen
- Capacity: Facial 500
- Communications: 10/100/1000 Mbps Ethernet Certified Wi-Fi 802.11 a/b/g with MIMO
- Facial Identification: Infrared light facial biometric that can identify user under 1 second
- AC Power Adaptor: 12V, 3.0A
- PoE (Power over Ethernet): PoEP IEEE 802.3at
- Battery: Up to 4-hour Idle and up to 2-hour Active Life
- Environment: Operating Temperature: 32F to 113F (0° C to 45° C).
- Operating Humidity: 5% to 80% non-condensing
- Dimensions: 12.3 x 5.6 x 3 (W x H x D)
